

Personnel Director

Chief, General Services

Employee Suggestion - Pneumatic Tube System,

1. Attached hereto is a report on the findings of this office with respect to the employee suggestion, subject as above.

2. Due to the many uncertainties prevailing at this time with respect to the tenure of CIA in buildings "I", "J", "K", and "L" we are of the opinion that the expenditure of approximately \$40,000 for such a system is not warranted at this time.

3. Pneumatic tube systems are being studied and considered in the plans for a new agency building.
